

The Leatic logo is a white graphic on a red rectangular background. It features the word "LEATIC" in a bold, italicized, sans-serif font. To the right of the text is a stylized white triangle with a registered trademark symbol (®) at its top vertex. The entire logo is centered at the top of the page.

LEATIC®

The text "2024" is overlaid on the bottom center of the image. The number "20" is in white with a red horizontal bar behind it, and the number "24" is in white below it. The background of the entire page is a high-angle photograph of a long, narrow dirt path cutting through a vast, shallow body of water. Three motorcyclists are riding along the path, moving away from the viewer. The water is a light, silty grey color, and the sky is a pale, clear blue. The path is flanked by low-lying green and brown vegetation. The overall scene is serene and suggests a remote, natural setting.

THE SCIENCE OF THRILL

Leatt was founded in 2004, with a mission to protect extreme sports athletes. Our story began when Dr. Chris Leatt – a rider, father and inventor – arrived on the scene of a fatal neck injury at a motorcycle enduro race. It was something Chris never wanted to see again. The fact that his four-year-old son had just started riding dirt bikes made the accident even more haunting. So Chris left his neurology studies and devoted his life to designing what would ultimately become the Leatt neck brace.

The Leatt-Brace® is now known globally as the gold standard for neck protection. The idea has proven itself by serving a generation of riders and winning countless awards. As the sport continues to progress – with riders going bigger and moving faster than ever – Dr. Chris Leatt remains committed to protecting these athletes and serving their ever-evolving needs.

This catalog showcases the best of the 2024 line, covering helmets, footwear, apparel, protection, hydration systems and accessories. Each of these pieces was born in Leatt's world class test lab in Cape Town, South Africa – and each of these pieces is designed to keep committed thrill seekers safer. When the difference between glory and disaster is often a matter of confidence, we know our role is essential. We're here to give riders the confidence and the equipment to not only push faster, harder and further than ever before, but to also make it home safely.

NECK BRACE VS NO BRACE

× × × × ×

% REDUCTION IN FORCES COMPARED TO NO BRACE

RESULTS FROM LEATT®'S IN-HOUSE LABORATORY TESTING

HYPEREXTENSION: Over-bending of the head in rearward direction. | **POSTERIOR HYPERTRANSLATION:** Extreme movement of head and helmet, rearward on the neck. | **HYPERFLEXION:** Over-bending of the head in forward direction. | **LATERAL HYPERFLEXION:** Over-bending of the head to one side. | **COUPLED AXIAL LOADING:** Helps prevent axial loading only when the axial forces act in combination with other mechanisms.

NECK BRACE TECHNOLOGY

× × × × ×

ULTIMATE FIT

SureFit adjuster system for the front and rear give the ultimate individual custom fit

BREAKAWAY THORACIC

SureFit adjuster system for the front and rear give the ultimate individual custom fit

INDEPENDENTLY LAB AND RIDER TESTED

"Up to 89% reduction in critical cervical spine injuries"
*Independent Motorcycle study by Action Sports EMS

COLLARBONE RELIEF CUT OUT

"Collarbone injuries up to 45% MORE likely WITHOUT a neck brace"

*Independent Motorcycle study by Action Sports EMS

MOTO 6.5 NECK BRACE CARBON

ULTIMATE PROTECTION WITH 3-WAY ADJUSTABILITY

PART NO	DESCRIPTION
1022111700	Neck Brace 6.5 Carbon #S/M
1022111701	Neck Brace 6.5 Carbon #L/XL

Independently lab and rider tested, proven to reduce neck forces and neck injuries through transferring the load during an accident away from the fragile bones in the neck | *Up to 89% reduction in critical cervical spine injuries | *Collarbone injuries up to 45% MORE likely WITHOUT a neck brace | *Independent Moto motorcycle study by Action Sports EMS | Engineered collarbone cut-out to keep your helmet rim away from your most fragile bones | Optimal helmet rim striking platform is designed to redistribute neck forces and provides the helmet with freedom of movement | CoreFlex split rear folding thoracic strut is designed to work with the body's natural movements for a more comfortable fit and break away before applying excessive pressure to the back | Sliding front and rear SureFit adjusters offers three-way adjustability for that perfect fit | Carbon matrix platform allows for efficient reduction in neck forces | Sculptured, split front for improved comfort and fit | Low profile push-button open/closure system | Easy-to-use emergency release mechanism | Injected, durable and easy-to-clean foam padding | CE tested and certified to the PPE Regulation (EU) 2016/425 | Weight: from 600g (1.32lbs) | Sizing: S/M - L/XL | Plastic Free Recyclable Packaging
